EDUCATION

Santa Clara University - M.S. in Business Analytics | GPA: 3.71/4.00 | Sept 2024 - Dec 2025

Data Analytics with Python, SQL Fundamentals, Tableau, Machine Learning, Deep Learning, Marketing Analytics

ITM Business School - Post Graduate Diploma in Management | GPA: 3.02/4.00 | Jun 2019 - May 2021

University of Mumbai - Bachelor's in Management Studies | GPA: 3.70/4.00 | Jun 2015 - May 2018

PROFESSIONAL EXPERIENCE

Santa Clara University

Research Assistant | Apr 2026 - Present

- Developing an agentic SQL system using LangChain, Groq-hosted LLMs, and MySQL, with autonomous schema inspection, query generation, validation, error recovery, and observability
- Building a Python data pipeline to clean, normalize, and batch-load 41K+ artwork and 70K+ image records using null-safe transformations and post-load verification
- Engineering reliable and auditable workflows through query-checking tools, retry logic, LangSmith tracing, domain-grounded prompts, and read-only database controls

Graduate Volunteer | July 2025 – March 2026

- Built and deployed a conversational Text-to-SQL application on AWS EC2 using Python, LangChain, OpenRouter LLMs, Streamlit, and MySQL, enabling natural-language exploration of 41K+ looted-art records
- Developed schema-aware SQL generation with conversational context, dynamic schema extraction, partial-text matching, and natural-language response generation
- Implemented SELECT-only validation, unsafe-query blocking, result limits, and schema-constrained prompts to improve accuracy and protect database integrity

Adobe (with Santa Clara University)

Data Scientist Practicum | Jan 2025 - Jun 2025

- Analyzed 6,400+ daily Adobe subscription-seat records using Python, Pandas, NumPy, Matplotlib, and Seaborn; cleaned missing values and tested stationarity with ADF, Phillips–Perron, and KPSS
- Engineered lag, rolling-window, fiscal-calendar, holiday, growth, and Fourier features using Pandas, NumPy, Statsmodels, and Scikit-learn to capture demand trends and seasonality
- Built and evaluated ARIMA, FFNN, RNN, and LSTM forecasting models with Statsmodels, TensorFlow/Keras, and PyTorch, achieving 2.4% MAPE on the best neural-network model

XL Dynamics India Pvt Ltd

Process Executive MIS | Nov 2021 - Aug 2024

- Built and maintained 30+ MIS reports, dashboards, and ad hoc analyses using SQL, Advanced Excel, and Power BI, providing senior management, finance, and marketing teams visibility into KPIs and performance trends
- Collaborated cross-functionally with 7–8 teams to identify product and process improvements, standardize reporting workflows, and deliver accurate analyses within deadline-driven environments
- Created and updated internal documentation, training materials, and reporting references; managed competing priorities, resolved data issues, and escalated risks to ensure timely delivery

MP Financial Advisory Services LLP

Credit Risk Analyst | Jun 2021 - Oct 2021

- Developed Excel-based financial models to evaluate creditworthiness and quantify risk exposure for 5 clients, delivering structured risk analysis summaries that informed lending and advisory decisions

Trio Logistics Pvt Ltd

Account Assistant | Jun 2018 - Jun 2019

- Managed reconciliation reports and monthly financial summaries for 50+ clients, ensuring accuracy for tax filing

PROJECTS

IdeaCourt: AI Startup Idea Validator | Agentic AI (Beta Fund x GMI Agent Hackathon)

- Built IdeaCourt using Codex and Claude Code, orchestrating 8 specialized AI agents with Tavily research to deliver evidence-backed Build, Pivot, or Do Not Build recommendations

- Engineered multi-model routing, Zod-validated outputs, provider fallbacks, and conditional PRD, financial, GTM, and UX generation using Next.js, TypeScript, React, and Vercel AI SDK
- Designed a six-dimension product-validation framework that translates market evidence into product decisions and conditionally generates PRDs, user stories, revenue scenarios, GTM experiments, and UX wireframes

HealthMate: AI Fitness & Nutrition Guide | Conversational RAG

- Built HealthMate, a full-stack AI fitness and nutrition coach using React, TypeScript, FastAPI, and LangChain, delivering grounded conversational guidance with memory and source-level citations
- Engineered a RAG pipeline across 8 curated health documents using Hugging Face embeddings, FAISS retrieval, and Groq LLM inference, with safeguards against unsupported or medical claims
- Established AI quality evaluation across 36 test cases using LangSmith and LLM-as-judge metrics for correctness, relevance, groundedness, and retrieval quality, supporting product reliability and iteration

Telecom Customer Churn Prediction | Classification & ML Pipeline

- Built an end-to-end churn prediction pipeline on approximately 500K telecom customer records using Python, Pandas, Scikit-learn, and SMOTE, covering EDA, preprocessing, feature encoding, and class balancing
- Trained and tuned Logistic Regression, Decision Tree, Gradient Boosting, and MLP models using 5-fold cross-validation; selected MLP for its highest ROC-AUC of 0.74 and 67% test accuracy, enabling stronger churn-risk ranking
- Identified support calls, payment delays, short tenure, and monthly contracts as key churn indicators and translated findings into targeted outreach, onboarding, and retention strategies

TECHNICAL SKILLS

- **Machine Learning & Deep Learning:** Regression, Classification, Neural Networks (ANNs, CNNs, RNNs), Transfer Learning, Ensemble Methods, Feature Engineering, Hyperparameter Tuning, Model Evaluation, Cross-Validation
- **AI & Data Products:** LLM applications, LangChain, AI agents, conversational AI, RAG, prompt engineering, vector databases (FAISS), LangSmith, LLM Ops, LLM evaluation, Hugging Face, multi-agent systems, NLP, computer vision
- **ML Frameworks:** Scikit-learn, TensorFlow, Keras, PyTorch, Statsmodels
- **Analytics & Reporting:** Python, SQL, MS Excel, Tableau, Pandas, NumPy, Matplotlib, Exploratory Data Analysis
- **Cloud & Tools:** AWS (EC2), Git, Github, Streamlit, REST APIs, Codex, Claude Code, GMI Cloud
